Image: Cliff Joseph/ZDNet There's a new Always Ready mode that automatically launches a specific virtual machine when you boot the Mac, but leaves it paused in the background so that it's instantly available as soon as you need to open a Windows app.. And, as Windows 10 is no longer a free upgrade, Parallels has worked with Microsoft to allow users to purchase and download the Windows 10 ISO file from within the program's setup wizard in order to simplify the creation of virtual machines that run Windows 10.. Followed the launch of Windows 10; it was a major upgrade that focused on supporting new Windows technologies, such as the Cortana voice-driven virtual assistant.. The standard Parallels Desktop 12 is designed for home and education use, and allows you to buy a one-off, single-user licence for £64.. Your Windows apps can also be assigned a series of 'behaviors', such as always opening in full-screen mode, or automatically hiding the Windows desktop and other apps.. Image: Cliff Joseph/ZDNet Top ZDNET Reviews Owing to the unavailability of Siri for OS X, support for Cortana is hailed as one of the top features of the year.. Parallels continues to finetune the program's performance, and we found that we were able to suspend or resume a Windows 10 virtual machine on our office iMac in just three seconds -- that's around 50 percent faster than with the previous version.
